SPECTRE WINTER COMBAT SHIRT REGULAR

MODEL DESCRIPTIONS

Winter Combat shirt windproof and water resistant. Made to protect operators in cold climates. The fabrics used are all 4 way stretch, of different weights and finishing, in order to guarantee more protection to the most exposed parts and greater transpiration in the parts subject to overheating. Compatible with all Plate Carriers and Body Armours, this 5th level Combat Shirt features a warm and comfortable zip closure on the neck, 4 operative pockets on the arms and elasticated cuff closures. A practical interface for lightsticks is just behind the high pockets on the arms. 2 axillary zips are available to emphasize transpiration and sweat evacuation in case of body overheating. Loop stretch patches are present on the high arms pockets to stick ID / IFF patches. Cordura protection on the elbow with removable soft antishock padding. This is an absolutely essential item for operations in cold and wet environments.
