STEALTH JACKET ADP REGULAR

MODEL DESCRIPTIONS

The result of an intense research activity carried out with one of the most prestigious mountain departments of the Italian army, this jacket and the pants of the same line create a perfect match.

The last-generation elasticated fabric and the ergonomic style offer unmatched comfort and an exceptional resistance to wear. Thanks to the nanotechnology used for its production, the fabric of this jacket remains at a constant temperature even when exposed to direct sunlight. It is also water repellent.

There are 2 pockets on the arms and 2 on the forearms.

All pockets and the central opening have a YKK zipper closure of various thicknesses depending on its function.

The patches on the elbows and shoulders are made of Cordura 500 to offer maximum protection from wear on the more exposed parts.

An elastic draw-string regulates tension on the hips.

One Italian patch and one SOD patch are enclosed.
