LITTLE BROTHER PACK G1 UNITO

MODEL DESCRIPTIONS

The Little Brother pack is a handy, stand-alone pack that's sold as part of our J79 Skycrane II system, and made to complement our J51 Warhammer packs. The G1 features an expansion tunnel that allows you to insert any of our side scabbards (sold separately). With our A4SS Tactical Weapon Carrier installed, the pack functions much like our G3M Phantom.

The pack features both top-loading and full-front panel loading. MOLLE/PALS webbing fills all useful spaces inside and out. There are two hydration sleeves on interior back wall sized for our WXP3L 3-liter bladders. A radio rack on back wall holds PRC-117 class military radios.

The pack comes with a harness. You can add our HBSS Hipbelt accessory if you want a supportive pack belt.

We offer two frame systems to add structure to this otherwise un-structured pack: First, our innovative Endo pack frame slides into the pack's main load bay, adding both vertical and lateral structure without compromising comfort or the pack's quiet ride.

The Endo doesn't interfere with the pack's ability to carry a scabbard in the tunnel; but if you're not planning to carry a scabbard, then our Gossamer frame (AG2S Gossamer Short frame) fits into the scabbard tunnel when it's zipped closed. Either option provides a simple and effective way to convert the G1 into a compact, structured internal frame pack.

Volume: Approx. 1800 cubic inches.

Weight = 4 lbs
