SURVIVAL CERBERO BACKPACK

MODEL DESCRIPTIONS

SOD SURVIVAL CERBERO BACKPACK with AG2S.
The Cerbero is a multi-functional backpack, suitable for anyone looking for a truly versatile adventure companion, adaptable to any situation and need, of 360° adventure experience.
The Cerbero has a minimum load capacity of 30 liters, expandable to a maximum load of 40 liters by opening a YKK zippered gusset.
Another feature that makes the Cerbero unique is the three "butterfly" shoulder strap attachment systems, allowing it to be converted from a two-shoulder backpack to a single-shoulder backpack.
The two removable shoulder straps are equipped with laser-cut MOLLE inserts and a height-adjustable chest strap;
Made of 500-denier Cordura and padded with air-net spacer, they are comfortable and snug, perfect for carrying heavy loads.
The backpack features laser-cut MOLLE platforms: two on the front, two on the sides, one at the bottom of the backpack, two on the lumbar area restraint belt, and two on the shoulder straps.
The laser-cut SOD is made of a highly resistant fabric that guarantees the perfect fastening and retention of utility pouches or ifaks in complete safety.
Another special feature of the Cerbero are the two expandable side pockets with gussets and elastic drawstrings, which allow the insertion and fastening of various-sized water bottles and 2-liter water bottles.
Cerbero features:
6 external compression straps with snap clips, removable with a "butterfly" system, useful for compressing the main compartment or for attaching items such as camera tripods, clothing, and utility pouches to the outside of the backpack.
At the top front of the backpack, there is an organizer pocket with a YKK zipper, containing a zippered mesh utility pouch and a scratch panel for attaching dedicated pouches.
The Cerbero is fully accessible thanks to its clamshell opening, allowing for quick and easy access to its contents at any time.
The two internal sides are entirely lined with scratch fabric for attaching dedicated pouches.
On the internal back panel, in addition to the pocket for carrying a Camelback or splint, there are 4 removable elastic straps for securing the load.
The upper part of the Cerbero features a low-profile carrying handle with a scratch-resistant strap and two left-right devices for Camelback tubes.
The back panel features three air-net spacer padded cushions, to promote ventilation and comfortable load carrying.
Inside the backpack is a pocket to house the Eberlestock A2S2 frame.

SURVIVAL CERBERO BACKPACK

THIS BACKPACK VERSION INCLUDES THE EBERLESTOCK AG2S ITEM.

The Cerbero is therefore able to meet the main needs and requirements of travelers, survivalists, and preppers seeking compactness, versatility, and functionality in a backpack, both in terms of carrying capacity and load capacity.

- Volume: 30 liters expandable to 40 liters.
- Material: 100% polyamide (500-denier Cordura).
- Dimensions: approx. 35/29 x 50 x 18 cm
- Weight: 2,300 gr.

AG2S GOSSAMER G-TYPE FRAME features:

Made of polycarbonate with vertical-axis stiffening channels, the Gossamer offers an ideal mix of vertical support and flexibility. It is quite durable and is superior to the polyethylene frame sheets that form the core structure of most internal frame packages.

- Weight: approximately 250 gr.
