SPECTRE PATROL BACKPACK

MODEL DESCRIPTIONS

SOD SPECTRE PATROL BACKPACK.
Backpack with a capacity of approx. 40L made of Cordura 1000D, composed of 2 compartments with different characteristics.
The first compartment is provided with a pouch to contain the hydration system and with an optional, shaped rigid frame.
The entire internal surface is covered in MOLLE to allow the mounting of internal pockets. Also, inside there are 3 retention straps to secure the field radio or other object that must be kept separate from the rest.
The front wall of the first compartment is covered in Velcro to allow compatibility with pockets with an interface with male Velcro. Some pockets have a typical medic. design.
The second compartment is totally covered in MOLLE to mount further pockets with this interface.
The front wall of the second compartment is provided with 3 net pockets with YKK zipper closure.
On the front externally there is a pocket that reaches the bottom of the structure, very useful for containing documents or objects with a limited thickness.
On the external sides there are 2 pockets with Velcro closure.
The shoulder straps, particularly comfortable and ergonomic are provided with straps and D-rings for every possible configuration.
The pack is provided with a robust handle on the sides of which are openings to allow the passage of wiring or the tube of the hydration system or aerials.
On the underside are 4 perforation to allow water to drain.
Provided with removable chest retention and with an abdominal belt this backpack can be configured in many different ways.
