SIDE SCABBARD

MODEL DESCRIPTIONS

The A2LS is a larger four-panel side scabbard, similar in length to the A2SS 3-panel scabbard. The A2LS Bolt Sniper Rifle scabbard is recommended for conventional bolt-action rifles with 50mm objective scopes and/or bipods (but note, depending on the configuration it is not likely to work with deep-bellied rifles such as the Accuracy International chassis, or AR-type weapons). The A2LS features a self-mounting strap and hook system which allows it to be attached to most Padlock/MOLLE/PALS panels. It works best with packs that have compression straps, or for internal mounting in our J79, J51, F52, or F4 packs. It's also a great companion with our H1 Mini Me pack. Pair it with our JSTC Butt Cover for a nice, snug drag bag / gun case.
Choose the smaller A2SS for conventional scoped hunting rifles with standard hunting scopes, and no bipod.
Choose the larger A4SS for bulkier weapons, such as AR-type weapons, Accuracy International style sniper rifles, or .50 cals.
Dimensions: 34"h x 7"w x 3"d, with a 20" circumference opening
Weight: 1 lb 5 oz
