Description.

NEW - Water-to-Go 75cl Active bottle includes a unique 3-in-1 filter with a BPA-free bottle, and click lid with integral drinking spout and protective, flip cap cover. It is perfect for those with a healthy, on-the-go lifestyle and this filter bottle has been specifically designed to fit bike racks.

The Water-to-Go 75cl Active bottle includes a unique 3-in-1 filter with a BPA-free bottle, and click lid with integral drinking spout and protective, flip cap cover. It is perfect for those with a healthy, on-the-go lifestyle and this filter bottle has been specifically designed to fit bike racks.

Our unique 3-in-1 filter has been created based on technology originally developed for the NASA space programme.

The filter works instantly to protect against bacteria, parasites and microplastics, reduces chemicals like chlorine and improves water taste.

The three technologies used in a Water-to-Go filter are:

1. Mechanical filtration; a very small pore size which stops contaminants passing through.
2. Electrical (by a positive charge) which reduces the pore size even further and attracts contaminants like a magnet, trapping them inside the filter.
3. Activated carbon -our filters use activated carbon without using adhesives that would vastly reduce the carbon's efficiency. Instead the activated carbon is contained within the filter membrane itself. This technique helps further reduce the contaminants whilst also eliminating bad tastes and odours.

# PRODUCT SHEET

## WATER TO GO BOTTIGLIE FILTRO 75CL ACTIVE

The filter is an ideal deal for hiking, camping, international travel and emergencies, it allows you to take any non-salt water from a stream, river, or tap and filter it instantly. Once the filter is activated and your bottle is full you are ready to drink, no need to remove the lid and filter until your ready to fill your bottle again.

The filter removes:

99.9999% for bacteria like E.Coli,

99.999-99.9999% for viruses like Polio,

99.99% for micro-organisms,

Heavy metals (like lead) and also Chlorine and Fluoride are also filtered.
